PRELIMINARY JOB DESCRIPTION FOR THE 2026 ECCEDU SUMMER GLOBAL INTERNSHIP

- **Name of the program organizer:** European Centre for Career Education s.r.o.
- **Name of the UCLA student:** Ben Luftig
- **Name of the internship company:** muunbase s.r.o.
- **Start date of the internship:** June 22, 2026
- **End date of the internship:** August 13, 2026
- **Total Hours:** approximately 256 (approximately 32 hours per week)

Company Description:

muunbase s.r.o. develops advanced data-collection hardware—including cameras, sensors, LiDARs, and GNSS—alongside a sophisticated processing pipeline that utilizes custom-trained AI and geospatial algorithms. Our ultimate goal is to deliver precise geospatial data to municipalities and to provide the foundational infrastructure for our proprietary, accessibility-oriented navigation application.

This is to state that the expected job description for the internship of Ben Luftig at muunbase s.r.o. is the following:

- Modeling for 3D printing
- Assisting with electrical engineering
- Implementing hardware (HW) modules
- Participating in machine learning (ML) system ideation
- Conducting failure analysis
- Performing real-world testing and iterative improvements

By signing this document, Ben Luftig and muunbase s.r.o. hereby confirm they agree with the above-stated job description for the summer internship 2026.

Ben Luftig
